

## ***Recommendation Letter***

To whom it may concern,

I would like to recommend my former postdoc, Haitham El-Hussieny, who is applying for the Assistant Professor position in Robotics at E-JUST.

I have been mentoring Haitham for one year during his postdoctoral position in KOREATECH university. I've come to know him quite well through his activities in BioRobotics lab and his remarkable passion to contribute. I know that he has a passion to learn through his interests by attending our weekly seminars, meetings, and even participating in international events.

Haitham is an enthusiastic, dedicated and conscious person. He has an intellectual capacity and willingness to explore new dimensions and learning areas. He has a noticed assimilator character. I believe that he would be able to gain success, easily, in his future postdoctoral position as his quality as a reflector would add to his natural eagerness to learn. He is a natural researcher and resourceful as well. I believe that he is an excellent candidate for the job that needs both high mental and working skills.

Haitham is very polite with highly noticed leadership qualities. He has high motivation and ambition. His logical thinking is outstanding. He has lateral and creative thinking ability as well. He can contribute in somewhat surprising fashion if he is given the opportunity.

I am proud to be his PI during his previous role. Thus, I would like to highly recommend him for winning a place in your offered position.

**Jee-Hwan Ryu,**  
Associate Professor  
Dept. of Civil and Environmental Engineering, KAIST

# **Reference Letter**

This reference letter is provided at the written request of Dr. Haitham El-Hussieny, who has asked me to serve as a reference on his behalf. It is my understanding that Haitham is being considered by your organization for the position of Assistant Professor in Robotics.

I have known Haitham for the past 13 years since he was a student under my supervision in his bachelor's degree until he has shared with me teaching robotics engineering course after he got the PhD.

Haitham has a significant talent in teaching undergraduate and postgraduate courses. I have had an opportunity to observe the student's participation and interaction in the class I am sharing with him in Benha University, Faculty of Engineering (Shoubra). I would rate the Haitham's overall performance in these subjects as excellent. This is evidenced by the satisfaction rate obtained from students attended our course.

Based upon Haitham's teaching performance and my understanding of the position for which he is applying, I believe Haitham would fit well.

If you would like to discuss this further, please feel free to contact me.

Sincerely,

## **Dr. Ashraf Hafez**

Lecturer, Faculty of Engineering (Shoubra)
